BMT Cord Blood Access Protocol	A Multicenter Access and Distribution Protocol for Unlicensed Cryopreserved Cord Blood Units (CBUs) in Pediatric and Adult Patients with Hematologic Malignancies and other Indications	Treatment	Abdel-Mageed, Aly	Laura Paulsen cancer.research@spectrumhealth.org (616) 486-8500
	<p><i>This is an access study in which umbilical cord blood used for bone marrow transplant is only available through this access and distribution study. In October 2011, the Food and Drug Administration (FDA) began considering cord blood as a biological drug. In the United States, drugs must meet standards set by the FDA to make sure they are safe. Cord blood units that were not collected, tested, or stored exactly according to FDA standards may be used for transplant if the transplant is done as part of a study.</i></p> <p>For More Information</p>			
NYBB UCB	A multicenter safety study of unlicensed, investigational cryopreserved cord blood units (CBUs) manufactured by the National Cord Blood Program (NCBP) and provided for unrelated hematopoietic stem cell transplantation of pediatric and adult patients	Treatment	Abdel-Mageed, Aly	Laura Paulsen cancer.research@spectrumhealth.org (616) 486-8500

GRAVITAS 309	A Phase 3 Study of Itacitinib or Placebo in Combination with Corticosteroids as Initial Treatment for Chronic Graft-Versus-Host-Disease	Treatment	Brake, Sami	Laura Paulsen cancer.research@spectrumhealth.org (616) 486-8500

ACCRU 2018-02	Blood Sample Collection to Evaluate Biomarkers in Subjects with Untreated Hematologic Malignancies	Other	CRCWM Physician Investigators	CRCWM (616) 391-1230 www.crcwm.org
Cardiac Strain	Utility of Serial Echocardiogram Parameters to Assess Cardiotoxicity and Evaluate Cardio-Protective Therapy in Adult Blood and Marrow Transplant Patients (Adult BMT)	Other	Williams, Stephanie	Laura Paulsen cancer.research@spectrumhealth.org
A051301	A Randomized Double-blind Phase III Study of Ibrutinib During and Following Autologous Stem Cell Transplantation versus Placebo in Patients with Relapsed or Refractory Diffuse Large B Cell Lymphoma of the Activated B-Cell Subtype	Treatment	CRCWM Physician Investigators	CRCWM (616) 391-1230 www.crcwm.org
E1910	A Phase III Randomized Trial of Blinatumomab for Newly Diagnosed BCR-ABL-Negative B Lineage Acute Lymphoblastic Leukemia in Adults	Treatment	CRCWM Physician Investigators	CRCWM (616) 391-1230 www.crcwm.org
Multiple Cord Blood	Allogeneic Stem Cell Transplantation Using Multiple Unrelated Donor Umbilical Cord Grafts	Treatment	Abdel-Mageed, Aly	Laura Paulsen cancer.research@spectrumhealth.org (616) 486-8500

This research study will evaluate the ability of umbilical cord blood cells, which have been obtained from multiple unrelated donors, to serve as a source of stem cells for patients undergoing stem cell transplant.

The use of a single unrelated umbilical cord blood unit is common for small pediatric patients requiring stem cell transplantation when a related or unrelated donor is not available. For larger patients, the use of more than one umbilical cord blood unit provides an adequate number of stem cells and increases the chances of successful engraftment and survival.

Brincidofovir	Expanded Access Protocol to Provide Brincidofovir for the Treatment of Serious Adenovirus Infection or Disease	Symptom Management	Duffner, Ulrich	Laura Paulsen cancer.research@spectrumhealth.org (616) 486-8500
----------------------	---	--------------------	---------------------------------	---

This study is an access protocol to provide treatment of the investigational drug called brincidofovir (or BCV for short) to treat the virus called adenovirus (or AdV).

Biorepository

SHARE	The Spectrum Health Universal Biorepository provides a robust, diverse offering of high, quality research and potential diagnostic samples associated with relevant de-identified clinical data to investigators	Biobanking	Cottingham, Sandra	Spectrum Health Biorepository david.chesla@spectrumhealth.org (616) 267-2629
--------------	---	------------	------------------------------------	---

This study will collect high-quality biologic specimens including tumor/diseased tissue, matched normal tissue, bodily fluids, and correlating health information from patients with the diagnosis of neoplasm or other conditions and related data for use in laboratory research.

Symptom Management

S1415CD	A Pragmatic Trial To Evaluate a Guideline Based Colony Stimulating Factor Standing Order Intervention and to Determine the Effectiveness of Colony Stimulating Factor Use as Prophylaxis for Patients Receiving Chemotherapy with Intermediate Risk for Febrile Neutropenia - Trial Assessing CSF Prescribing Effectiveness and Risk (TrACER)	Symptom Management	CRCWM Physician Investigators	CRCWM (616) 391-1230 www.crcwm.org
