G-MINOR	Genomics in Michigan Impacting Observation or Radiation	Registry	Lane, Brain	Heidi Chapman Heidi.Chapman@spectrumhealth.org (616) 486-2076

The G-Minor study is for men who have had a radical prostatectomy with high risk factors on their pathology. We are comparing how two tests (the Capra-S Nomogram and the Decipher® Test) to see how they affect the patient and physician's decisions regarding receiving additional treatment after surgery. The tests give a percent chance of the prostate cancer recurring or spreading in the future.
