Sleep Apnea Microbiome Study	Sleep Apnea Microbiome Study	Correlative Science	Tamae Kakazu, Maximiliano	Yvonne Edgerly Yvonne.Edgerly@spectrumhealth.org (616) 391-5066
<i>At present, the only way to screen and diagnose obstructive sleep apnea is by performing a sleep study which is not available to all children. This study will try to evaluate if changes in the stool flora or microbiome (microorganisms normally present in your body) could be used to screen or diagnose children with obstructive sleep apnea.</i>
