MSU Hypersensitivity Pneumonitis	<p>Improved Method for Identifying Causative Antigen in Hypersensitivity Pneumonitis</p> <p><i>To identify the exposure at home and/or workplace that is causing exacerbations of hypersensitivity pneumonitis.</i></p>	Treatment	Schmidt, Shelley	Melissa Boerman Melissa.Boerman@spectrumhealth.org (616) 486-6082
AFFILIATE	<p><u>AFFILIATE</u>: Multinational, Multicenter Study to Assess the Effects of Oral Sildenafil on Mortality in Adults with Pulmonary Arterial Hypertension (PAH)</p> <p><i>This research study compares three different doses of the drug Sildenafil, used to treat patients with pulmonary arterial hypertension.</i></p> <p>For More Information</p>	Treatment	Dr. Reda Girgis	Melissa Boerman Melissa.Boerman@spectrumhealth.org 616.486.6082
INCREASE	<p><u>INCREASE</u>: A Multicenter, Randomized, Double-Blinded, Placebo-Controlled Trial to Evaluate the Safety and Efficacy of Inhaled Trepostinil in Subjects with Pulmonary Hypertension due to Parenchymal Lung Disease</p> <p><i>This research study will evaluate the safety and effectiveness of inhaled trepostinil in patients with pulmonary hypertension associated with interstitial lung disease including combined pulmonary fibrosis and emphysema.</i></p> <p>For More Information</p>	Treatment	Dr. Reda Girgis	Melissa Boerman Melissa.Boerman@spectrumhealth.org 616.486.6082

Promis II

Promis II: A double-blind, placebo controlled, multi-centre, clinical trial to investigate the efficacy and safety of 24 months of therapy with inhaled colistimethate sodium in the treatment of subjects with non-cystic fibrosis bronchiectasis chronically infected with pseudomonas aeruginosa (P.aeruginosa)

A 24 month double blinded study for patients with non-cystic fibrosis bronchiectasis (NCFB) chronically infected with P. aeruginosa to look at the effect of the use of inhaled colistimethate sodium vs. placebo taken twice daily via the I-neb device.

Treatment

[Dr. Jacob Scott](#)
