

# COVID-19 Newborn Testing Algorithm—November 30, 2020, 1800

Spectrum Health Contact: Daliya Khuon \*red text denotes new content

Date reviewed: November 30, 2020

1. If mother is asymptomatic & refuses testing: CDC instructs not to treat as a suspected COVID patient (PUI)
2. If mother tested positive within the last 90 days, no repeat testing is indicated unless new symptoms have developed. See [Retesting Guidelines](#).
3. Mother is no longer considered contagious if she meets [Provider Guidelines for the Discontinuation of Severe Respiratory Precautions for Patients with COVID-19](#)
