

Order Details and IV Pump Programming May 5, 2021

Spectrum Health Contact: Logan Dumond

Document Reviewed 05/05/2021 0930

The following patients are in EPIC Playground. These medications are some of the infusions located within Continuous Intravenous (IV) Preparation and Administration Appendix A (Adult): Intravenous Infusions on Specific Units - Grand Rapids Reference # 24652.

- Log on to Epic Playground
- Click on patient list
- Under “search all admitted” type the patient’s name below

Username: IPRN51, **password:**

Train123 Unit: SHBW 9C

Name	DOB	Medication
Cathy Smith - SIM	3/20/1994	Cardizem

See Cardizem orders for specifications regarding titration.

Username: IPRN51, **password:**

Train123 Unit: SHBW 9C

Name	DOB	Medication
Marcus Brown - SIM	12/22/1948	Amiodarone

Notice on the MAR Amiodarone is a phased infusion. The Phase 1 bolus shows up as a one-time intravenous dose. Phases 2 and 3 are linked under continuous infusions.

Username: IPRN51, **password:**

Train123 Unit: SHBW 9C

Name	DOB	Medication
Caroline Williams - SIM	3/17/1964	Nitroglycerin

See Nitroglycerin orders for specifications regarding titration.

For admitted patients use **Adult Progressive Care** drug library in Baxter pump. If you also want to practice accessing medications in a Baxter IV pump utilize **zzzADULtrain/Biomed**.

These two medications are not ordered on the EPIC Playground patients. See screen shots below for order details.

milrinone (PRIMACOR) infusion 200 mcg/mL : Ordered Dose 0.2 mcg/kg/min × 60 kg : Admin Dose 12 mcg/min : 3.6 mL/hr : Intravenous : ! 📄 ℞
 Continuous : 👤
