

# PPE Selection for Ambulatory Spaces 4.6.2021 1200

Spectrum Health Contact: Cathy Ostrowski

Document reviewed: 4.6.2021

**Applicable settings:** Ambulatory clinics, urgent care, home care, outpatient radiology, outpatient rehab and outpatient lab.

After patient screening follow the algorithm for PPE selection:

**Figure 1.** Eye protection is required for all patient care encounters.

**Figure 2.** Standard isolation mask when within 6 feet of patient for < 15 minutes. N-95 respirator when within 6 feet of COVID-19 positive/suspect patient for > 15 minutes. Eye protection is required.
