

Modifying Standard Isolation Masks for Pediatric Patients 11.3.2020 1548

Spectrum Health contact: Jessica McClusky *Highlight denotes new content

Document reviewed: 11.3.2020

When pediatric size isolation masks are not available, a standard isolation mask may be modified for a pediatric patient using one of the methods below:

- **Utilize an ear saver:**

- **Tie the mask ear loops:**

- Reminder, Spectrum Health does not require masking for children (under 18 years old) who meet the following criteria:
 - Are under 5 years of age
 - Do not tolerate wearing a mask for medical or other reasons
 - Are unable to remove their own mask
