

Recycle your old car seats

Join us in keeping car seats out of landfills

- Did you know car seats have an expiration date?
- Did you know car seats that have been involved in a crash should be destroyed and replaced?

Steps to recycle your car seat:

1. Remove all fabric, all straps, all Styrofoam and padding. Throw these away.
2. Bring the stripped seat, the bare plastic shell, to one of our event locations.
3. You can find the list of our event locations on our website, www.helendevoschildrens.org/injuryprevention

If you have additional questions about car seat recycling please contact us at 616.391.7233 or injuryprevention@helendevoschildrens.org

**Helen DeVos Children's Hospital is one of only 2 programs in the state of Michigan that offers car seat recycling. We are proud to help care for the environment in this small way.
