Comments: PROVIDER TO EVALUATE NEED FOR VIRAL SCREENING: The ASCO hepatitis B screening and management provisional clinical opinion (www.asco.org/supportive-care-guidelines) recommends hepatitis B virus (HBV) at the beginning of systemic anticancer therapy; anticancer treatment should not be delayed for screening/results. Detection of chronic or past HBV infection requires a risk assessment to determine antiviral prophylaxis requirements, monitoring, and follow-up.

NCCN SUPPORTIVE CARE GUIDELINES FOR PREVENTION AND TREATMENT OF CANCER-RELATED INFECTIONS: The current NCCN guidelines state that providers should "consider" screening for HBV, HCV, and HIV prior to induction of immunosuppressive or chemotherapy.
